***Claim Rejections - 35 USC § 112***

1. Claims 1-7 and 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, line 3, "said a DDR DRAM" does not have a clear antecedent basis.

As per claim 21, line 2, step "f)" this step start with letter "f" already exist in claim 1. Appropriate correction and/or clarification is required.

As per claim 22, line 2, step "f)" this step start with letter "f" already exist in claim 1. Appropriate correction and/or clarification is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2138

3. Claims 1-6 and 15-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Murai et al (6,496,429).

As per claims 1-6, Murai et al disclose the invention substantially as claimed, comprising:

a) placing a DDR DRAM having a test node and normal operational mode in test mode;

b) issuing a bank activate command to select and bring up a wordline selected for write of the DDR DRAM;

c) writing with auto-precharge is inherent in the system of Murai et al, a test pattern to cells of the DDR DRAM;

d) repeating steps (b) and (c) until all wordlines for write have been selected;

(e) issuing a bank activate command to select and bring up a wordline selected for read of the DDR DRAM;

(f) reading with aut-precharge is inherent in the system of Murai et al, the stored test pattern from cells of DDR DRAM; and

(g) repeating steps (e) and (f) until all wordlines read have been selected. (See col. 5, lines 1-20, col. 6, lines 34-42, col. 10, lines 16-30 and col. 24, lines 40-67 to col. 24, lines 1-10).

As per claims 15-22, these claims are rejected under similar rationale as set forth in claims 1-6.

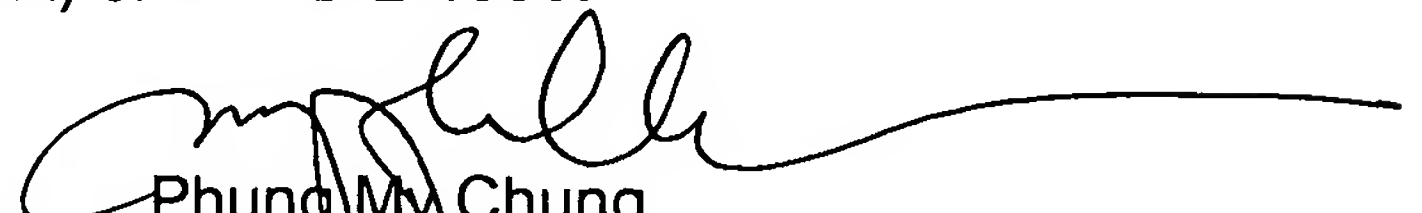

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments with respect to claims 1-7 and 15-20 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.
